The Health Department KP in collaboration with USAID funded Global Health Supply Chain Program-Procurement and Supply Management (GHSC-PSM) project organized a two-day workshop for standardization of services and supply chain indicators in District Health Information System (DHIS) KP.

The system already deployed province wide is being enhanced to include new indicators as per emerging requirements and global

commitments.

The department is eyeing at an integrated real time management information system leading to Electronic Medical Reporting (EMR) and DHIS-2 implementation.

The workshop was attended by the representatives from Health department, vertical programs and partners including Chemonics, JSI, OPM and GIZ.

Dr. Azamatullah, Director DHIS, provided his technical insights for standardization of indicators at primary and secondary health care levels.
